

# Selective. Attractive Growth. Undervalued.

“What gives us confidence that our Funds will build wealth for our shareholders in the years and decades to come? The compelling attributes of our businesses.

By being highly selective and rejecting the vast majority of companies in the index, we’ve built portfolios that have grown faster than the companies in the index, yet are significantly less expensive. In fact, this gap between price and value is among the widest we have ever seen. We believe this sets the stage for attractive returns in the years ahead.”

Chris Davis, Portfolio Manager

	Selective Holdings	Attractive Growth EPS Growth (5 Year) <sup>1</sup>	Undervalued P/E (Forward) <sup>2</sup>
Selected American Shares	37	12.1%	11.3x
Selected International Fund	24	10.1%	6.3x

***Before investing in the Selected Funds, you should carefully consider the investment objectives, risks, fees, and expenses of the Funds. The prospectus and summary prospectus contains this and other information about the Funds. You can obtain performance information and a current prospectus and summary prospectus by visiting [selectedfunds.com](http://selectedfunds.com) or calling 800-243-1575. Please read the prospectus or summary prospectus carefully before investing or sending money. Investing involves risks including possible loss of principal.***

Data is as of 6/30/23 unless otherwise specified. Number of holdings is subject to change. **1.** Five-year EPS Growth Rate (5-year EPS) is the average annualized earnings per share growth for a company over the past 5 years. The values shown are the weighted average of the 5-year EPS of the stocks in the Fund, Portfolio, or Index. Not all assets of the Funds and Portfolios are accounted for in the calculation of 5-year EPS as relevant information on certain companies is not available to the

Advisor's data provider. Approximate amounts are: SAS: 3.53%; SIF: 16.38%; **2.** Forward Price/Earnings (Forward P/E) Ratio is a stock's price at the date indicated divided by the company's forecasted earnings for the following 12 months based on estimates provided by the Fund's data provider. These values for both the Fund and the Index are the weighted average of the stocks in the portfolio or index.

**Objective and Risks.** Selected American Shares' investment objective is capital growth and income. In the current market environment, we expect that income will be low. There can be no assurance that the Fund will achieve its objective. Selected American Shares invests primarily in equity securities issued by large companies with market capitalizations of at least \$10 billion. Selected International Fund's investment objective is capital growth. There can be no assurance that the Fund will achieve its objective. Some important risks of an investment in the Fund are: **stock market risk:** stock markets have periods of rising prices and periods of falling prices, including sharp declines; **common stock risk:** an adverse event may have a negative impact on a company and could result in a decline in the price of its common stock; **financial services risk (SAS only):** investing a

significant portion of assets in the financial services sector may cause the Fund to be more sensitive to systemic risk, regulatory actions, changes in interest rates, non-diversified loan portfolios, credit, and competition; **exposure to industry or sector risk (SIF only):** significant exposure to a particular industry or sector may cause the Fund to be more impacted by risks relating to and developments affecting the industry or sector; **foreign country risk:** foreign companies may be subject to greater risk as foreign economies may not be as strong or diversified. As of 6/30/23, Selected American Shares had approximately 16.6% of net assets invested in foreign companies; **headline risk:** the Fund may invest in a company when the company becomes the center of controversy. The company's stock may never recover or may become worthless; **large-capitalization companies risk:** companies with \$10 billion or more in market capitalization generally experience slower rates of growth in earnings per share than do mid- and small-capitalization companies; **manager risk:** poor security selection may cause the Fund to underperform relevant benchmarks; **depository receipts risk:** depository receipts may trade at a discount (or premium) to the underlying security and may be less liquid than the underlying securities listed

on an exchange; **emerging market risk:** securities of issuers in emerging and developing markets may present risks not found in more mature markets. As of 6/30/23, Selected International Fund had approximately 48.9% of net assets invested in emerging markets; **fees and expenses risk:** the Fund may not earn enough through income and capital appreciation to offset the operating expenses of the Fund; **foreign currency risk:** the change in value of a foreign currency against the U.S. dollar will result in a change in the U.S. dollar value of securities denominated in that foreign currency; and **mid- and small-capitalization companies risk:** companies with less than \$10 billion in market capitalization typically have more limited product lines, markets and financial resources than larger companies, and may trade less frequently and in more limited volume. See the prospectus for a complete description of the principal risks.
